Software Developer

Software Developer with a strong passion for frontend development, excels in creating engaging user interfaces using React and NextJS while making SQL queries and apis. A Flatiron School graduate, I specialize in responsive design using React, CSS, Python, and Javascript integration for consumer-facing web applications. Committed to continuous learning, driving technical innovation through collaboration.

TECHNICAL SKILLS

JavaScript, React, Redux, TypeScript, HTML, CSS, TailwindCSS, Ruby, Git, GraphQL, Node.js, Prisma, Python, Django

TECHNICAL PROJECTS

Learning Management Platform - [Github](#) | [Demo](#)

A Google Classroom-like platform for course creation and purchase.

- **E-Commerce & API Integration:** Implemented Stripe APIs for course purchases, showcasing my skills in E-Commerce and API management.
- **Full Stack Development & Technology Integration:** Managed complete development cycle, from front-end React development to backend Ruby on Rails and SQL database management.

Online Booking App - [Github](#) | [Demo](#)

An app for booking eyelash appointments with a user-friendly interface.

- Designed and implemented complex SQL queries to retrieve student progress data for analytics and reporting purposes on the E-Learning Platform
- **Full-Stack Application Development:** integrated front-end technologies like React, HTML, CSS, and JavaScript with a Node.js backend. a responsive, efficient real-time appointment booking and user data management.

Portfolio - [Github](#) | [Demo](#)

- **Enhanced User Experience:** Integrated Framer-Motion to infuse the website with fluid, eye-catching animations, elevating the user interface and overall user experience.

EXPERIENCE

Software Engineer, WeVote | 06/2024 - Current

- **Automated Quality Assurance:** Developed and deployed internal scripts using Django to automate QA processes, significantly reducing manual testing time and improving code quality.
- **Legacy Code Overhaul:** Conducted comprehensive refactoring of React, Javascript legacy code, resulting in a notable increase in website performance and maintainability. Implemented best practices for code efficiency and readability.

Full Stack Developer, Freelance - Remote | 11/2023 - 6/2024

- **Frontend Development & User Experience:** Focused on building intuitive user interfaces with React, emphasizing responsive design and user experience.
- **Backend Management & Technology Integration:** Managed server-side development using Node.js and Prisma, integrating diverse technologies for efficient system operations.

EDUCATION

Flatiron School, Full Stack Web Development Certification
Clear Falls High School, Diploma

Remote | 10/2023
League City, TX | 06/2017
